Safety

Satellite anti-theft device*

A kit comprising an extremely small control unit, a GSM Dual Band with **hands-free function**, an anti-tilt sensor and a starting lock using the most advanced services and technology. The **activation** of the system is **simple** and **automatic**. Connected to the car battery, it works constantly using very little energy. When the driver leaves the car, if any of the doors is opened, **60 seconds** later, the satellite surveillance and starting lock are automatically activated. The engagement is signalled by the control panel and the red LED flashing. The radio card is used to deactivate the system allowing the user to release the MetaSat without

having to carry out any special operations thanks to the automatic transmission of the recognition code via radio.

MetaSat is innovative through:

- Vehicle telephone with optional hands-free kit
- Radio cards for automatic switching off
- Immobilizer for unauthorized starting
- No GSM signal indicator
- SMS for vehicle exterior alarm
- SMS for battery run down warning
- Speed remote control
- Sleepmode function for drastic reduction in energy consumption
- Sim Card included.

MetaSat can be used in conjunction with any Lineaccessori MetaSystem alarm. No. 50901042

WFS alarm*

Modular alarm fully managed by original radio control. The product is permanently connected to the vehicle can bus and includes anti-intrusion protection for the doors, the bonnet and the boot, it is also equipped with ultrasound for volumetric protection of the passenger compartment, a panel sensor and wfs siren with an independent supply. The connection of the alarm to the vehicle electrical system is facilitated by the modular structure and the small number of wires to be connected and by the wfs system which has a connection between the control unit and the siren without having to pass

additional cables from the engine compartment to the passenger compartment. For vehicles with original remote control. No. 50901287

For vehicles without original remote control. No. 50901288

Reversing sensor fitted to number plate*

Rear parking sensor with 2 capsules for securing to the number plate holder supplied with the kit which warns that the vehicle is getting close to an obstacle through an acoustic signal. No. 71802634
