Note * - A guide on fuel economy and CO2 emissions which contains data for all new passenger car models is available at any point of sale free of charge. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO2 emissions. CO2 is the main greenhouse gas responsible for global warming.

Note ** - At maximum towing weight the trailer must have remote braking capability.

The manufacturer reserves the right to change specification at any time. Please check with your local dealer for the latest information and offers.
